

QUALITY GROWTH PROGRAM

KEY HIGHLIGHTS

- Experienced money manager with \$1.5 billion AUM
- Excellent long-term track record (independently verified)
- Profit-based management fee ("qualified clients" only)

INVESTMENT STRATEGY

The Quality Growth Program—Check Capital’s flagship strategy—seeks to identify well-run, industry-leading growth companies and buy their stock when each is bargain priced. Portfolios are typically comprised of between 15 and 25 stocks, with holding periods often three-to-four years or longer. The Quality Growth Program is a core strategy for long-term investing.

*Results are after a 10%-of-profits fee

NOTES TO PERFORMANCE: The composite includes all discretionary separately managed accounts which follow the firm’s Quality Growth Program investment strategy, including those accounts no longer with the firm. Composite returns are presented net of a 10%-of-profits management fee and includes the reinvestment of all income. Past performance is not a guarantee of future results. Also, it can’t be assumed that the Top 10 Holdings shown above will generate any particular future performance. A list of all recommendations made over the last 10 years is available upon request. The S&P 500 Index is a widely recognized, unmanaged index of 500 common stocks which are generally representative of the U.S. stock market as a whole. A GIPS-compliant performance presentation accompanies this fact sheet.

Check Capital Management Inc. ("CCM") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. CCM has been independently verified for the periods 1/1/1987 to 9/30/2019. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The Quality Growth Program Composite has been examined for the periods 1/1/1987 to 9/30/2019. The verification and performance examination reports are available upon request. See Notes below.

1. CCM is an independent registered investment advisor established in 1987. A complete list of composite descriptions and policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.
2. The Quality Growth Program Composite ("Composite") includes all fully discretionary, fee-paying accounts that are managed under CCM's Quality Growth Program. Quality Growth Program accounts invest in durable growth company stocks. Most companies earn more than \$200 million in annual profits, have stocks ranked B+ or higher by Standard & Poor's, and have shown 8%-or-greater annual earnings growth over the last decade. Fully invested portfolios usually hold 15-25 stocks. The Quality Growth Composite was created in February 1991. For performance data after 1/1/2013, accounts under \$100,000 were excluded from the Composite.
3. Rates of return include all dividends, interest and realized and unrealized gains and losses; the returns also include the cost of brokerage commissions. Cash and cash equivalents are included in the performance of the Composite. Performance results are presented before and after the highest asset-based management fee and the highest profit-based management fee. Returns are stated in U.S. dollars.
4. CCM offers two management fee options: (1) Profit-Based Fee: 10% of account profits after trading costs, or (2) Asset-Based Fee: 1.0% of assets under management annually.
5. 3-Yr Std Dev is the annualized standard deviation of the monthly returns over the last three years. Dispersion is the asset-weighted standard deviation of annual returns of all portfolios in the Composite for the entire year. Total Firm Assets Under Management are the total assets of all discretionary and non-discretionary accounts managed by CCM.
6. Past performance is no guarantee of future results. Any investment in marketable securities has the possibility of both gain and loss. Performance returns may reflect the effect of material economic and market factors not anticipated by CCM.
